Persian(Native)

English(Fluent)

Experience

Rad cars auto group

A high-end automotive gallery platform built for the U.S. market.
Admins can upload and manage car listings, while users can explore, filter, and select vehicles.
Developed with Next.js, React, Tailwind CSS, Django REST Framework, and PostgreSQL — featuring lightning-fast performance, clean UI, and a scalable backend architecture.

Tech Stack: Next.js · React · TailwindCSS · Django REST Framework · PostgreSQL

ChasbLine

An e-commerce platform specialized in industrial and construction adhesives, featuring a fully custom Admin Panel and nationwide delivery system.
Includes OTP-based authentication, product management, payment integration, and customer order tracking.

Tech Stack: Django REST Framework · Next.js · React · TailwindCSS · PostgreSQL · Typescript

Counseling center hadaf

A psychological counseling and appointment system for both online and in-person sessions. Features OTP login, online psychological tests (available after payment), an integrated blog system, and a dedicated admin dashboard for session management

Tech Stack: Next.js · React · TailwindCSS · Django REST Framework · PostgreSQL

Mintgem

A modern digital gaming currency shop, offering in-game credit for titles such as Clash of Clans, PUBG, and Call of Duty.
The platform is designed for speed, SEO, and conversion, featuring a dynamic product catalog and seamless checkout.

Tech Stack: Next.js · React · Django REST Framework · TailwindCSS

Nakhostin Academy

An online attendance and management system for a technical training center.
Built using Deno, Next.js, and PostgreSQL, the platform enables real-time attendance tracking, course management, and analytics for students and instructors.

Tech Stack: Deno · Next.js
